SUMMARY

Dynamic Full-Stack Developer specializing in React and Node.js, with hands-on expertise in architecting scalable microservices and distributed systems. Passionate about leveraging cloud platforms, Docker, and container orchestration to bridge the gap between high-performance frontends and robust DevOps infrastructure.

SKILLS

Frontend Engineering — React.js, Redux Toolkit, Tailwind CSS, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive UI/UX Design

Backend & System Architecture — Node.js, Express.js, Microservices Architecture, API Gateway Pattern & Microservices, TypeScript, RESTful APIs, WebSockets (Socket.io), Real-Time Event Handling

AI, Agents & Data — LangChain, LangGraph, Autonomous Multi-Agent Workflows, RAG, LLM (Groq, Gemini, OpenRouter), MongoDB, PostgreSQL, Redis, Qdrant

DevOps & Tooling — Docker, AWS (EC2, S3), Vercel, Render, Firebase Auth, Git, Postman, RazorpayAPI

TECHNICAL EXPERIENCE

CipherAI - Cloud AI IDE & Real-Time Execution Platform

Live Demo 🔗 | GitHub Repo 🔗

- **Deployment & Infrastructure:** Architected a unified Express API Gateway routing to isolated microservices, deployed on Render and Vercel. Implemented proactive health-check polling to optimize cold-start latency by 85% and ensure continuous high-availability service.
- **Gateway & Cross-Domain Auth:** Built an API Gateway with Firebase Google OAuth and Redis sessions, fixing cross-domain cookie drops via Express trust proxy, SameSite=None, and Axios withCredentials.
- **Real-Time Web Terminal:** Integrated an in-browser terminal using Socket.io and http-proxy-middleware upgrade hooks, enabling bi-directional shell command execution (ls, pwd) across isolated service ports.
- **AI Code Engine & Billing:** Implemented autonomous LLM tool-calling (create_file, create_folder, get_tree) to generate file systems via internal x-user-id headers, gated by a Razorpay credit checkout flow.

MeshRoute AI – Microservices AI Agent Platform

Live Demo 🔗 | Frontend Repo 🔗 | Backend Repo 🔗

- Architected a 5-microservice AI platform (Gateway, Auth, Chat, Agent, Billing) on Node.js and Express.
- Engineered multi-agent workflows using LangChain and LangGraph with Groq and Google Gemini models.
- Developed a React/Vite frontend on Vercel with Redux Toolkit, Tailwind CSS, and Firebase OAuth.
- Integrated secure Razorpay payment processing tied to user credit and subscription plans.
- Configured MongoDB Atlas and Upstash Redis for persistent state management and caching.
- **System Reliability:** Developed automated background cron jobs to maintain persistent state and ensure zero-downtime platform performance.

Modern Invoice Creator

Live Demo 🔗 | GitHub Repo 🔗

- Developed a full-stack billing app with React, Firebase, and a real-time revenue dashboard featuring decimal tax calculations.
- Integrated Cloudinary API and automated PDF generation for professional client invoicing.

EDUCATION

Bachelor of Technology

University of Petroleum And Energy Studies (UPES)

2024

Dehradun
